

SERVIDOR EUREKA

Eureka server

- Servidor para registro y descubrimiento de servicios
- Permite acceder a los servicios sin conocer su ubicación real y puerto

Creación del servidor Eureka

- Se crea como microservicio Spring Boot
- Requiere la dependencia Eureka server:

```
<dependency>  
    <groupId>org.springframework.cloud</groupId>  
    <artifactId>spring-cloud-starter-netflix-eureka-server</artifactId>  
</dependency>
```

- Clase main anotada con @EnableEurekaServer

```
@SpringBootApplication  
@EnableEurekaServer  
public class Application {  
    public static void main(String[] args) {  
        SpringApplication.run(Application.class, args);  
    }  
}
```

Configuración del servidor Eureka

application.yml

```
spring:
  application:
    name: eureka-server
server:
  port: 8761
eureka:
  client:
    registerWithEureka: false
    fetch-registry: false
    serviceUrl:
      defaultZone: http://localhost:8761/eureka
```
